

nugal biik plants and seeds is a Wollert based production nursery specialising in indigenous flora of the greater northern region of Melbourne. Proudly climate positive, the nursery operates as a social enterprise, supporting local First Nations initiatives and conservation activities.

We collect our seed from local sources and our onsite seed production areas to ensure our plants are best suited to local conditions. Not all plants on this list are available at any one time and supply may be restricted due to limitations in seedbank and insufficient lead time. To enable us to fulfil your orders, please allow the maximum lead time possible, ideally 6-12 months.

For further information on our plant species, availability and orders, please contact us on **0483 294 547** or email: info@nugalbiik.org.au
