

**nugal biik plants and seeds** is a Wollert based production nursery specialising in indigenous flora of the greater northern region of Melbourne. Proudly climate positive, the nursery operates as a social enterprise, supporting local First Nations initiatives and conservation activities.

## who we work with

- Natural Resource Management companies
- Local councils
- Land owning businesses
- Developers and their contractors
- Conservation organisations and community groups
- Partner nurseries
- Victorian Government statutory agencies

## projects we support

- Local provenance revegetation
- Climate-resilient streetscapes and park landscaping
- Threatened species reintroductions
- Contract growing for partner nurseries

## products

Our local indigenous stock list encompasses a full range of terrestrial, aquatic and semi-aquatic species, from grasses to shrubs to trees.

### Current offerings:

- Standard forestry tubes
- Hyko cells

### Future offerings:

- Larger pot sizes
- Native grass and wildflower seeds

Contact our friendly nursery team for a stock list, to place an order or to arrange a visit to our site.

## updates

nugal biik plants and seeds is open for business!

### Late 2023

- We began production at our interim site with an order for 30,000 tubestock.

### Late 2024

- We will move to our permanent site, where brand new infrastructure awaits, including a shed, greenhouses and shade structure that will enable production of 500,000 tubestock per annum over time.

We are currently taking orders for delivery in 2025.

## A climate positive nursery

At our Wollert Community Farm location, in partnership with Yarra Valley Water, nugal biik plants and seeds will be powered by green energy from the onsite ReWaste facility and irrigated with Class A recycled water from the adjacent Aurora Treatment Plant.

# nugal biik | belongs to the earth

nugal biik means 'belongs to the earth' in Woi-wurrung and is the name for a cluster of activities delivered by Whittlesea Community Connections at Wollert Community Farm. nugal biik activities focus on restoring natural heritage through revegetation and ecological management, and facilitating First Nations led initiatives and connection to Country. Proceeds from nursery operations will help support nugal biik activities such as:

### Rangers programs

connecting local First Nations people to Country and culture through conservation and land care activities.

Mini and junior rangers out on Country with Wurundjeri Woi-wurrung elder

### Biodiversity and revegetation programs

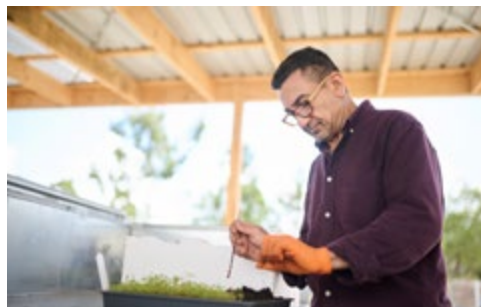

engaging volunteers in local restoration efforts, with an emphasis on Wollert Community Farm's Curly Sedge Creek, stony knolls and grassy woodlands.

Volunteers revegetating Curly Sedge Creek

**Employment pathways,** training and skills development for youth, refugees and First Nations people are embedded into the work of the nursery.
